### **PROFILE**

Customer-centric and detail-oriented Front-End Developer with a passion for developing functional and responsive designs. I bring 4 years of project management and Agile Software Development Lifecycle (SDLC) experience where I collaborated with Developers to deliver a front end focused products. I gained web development experience using React, HTML, CSS and JavaScript after completing immersive bootcamp at Juno College. My business knowledge and collaboration skills enable me to solve complex technical problems in fast-paced environment.

### **EXPERTISE**

### **Technical Skills:**

HTML, CSS, SASS/SCSS, Javascript, jQuery, React, API integration, Wordpress, GIT, Firebase, NodeJs and VS Code.

### **PROJECTS**

- \* <u>City Bike Share</u> (jQuery, HTML, SASS, API): jQuery interactive app, accessing a public bike share API and manipulating DOM to display data of number of bikes available at a specific bike share stand within 0.5KM of a pre-selected location in Toronto.
- \* <u>Dream Desk Store</u> (React, Firebase, HTML, CSS): An interactive React application that renders data from Firebase. App allows users to add to cart desks, with the cart counter updating and checkout details displayed.
- \* Quarantine Trivia (React, Firebase, HTML, CSS): Interactive React app utilizing AXIOS to access Quiz data and render it for the user. User is able to choose from 20 categories, save quiz (stored in firebase) and access it later. app displays whether the answer was correct or incorrect and user score.

### **EXPERIENCE**

# CUSTOMER SERVICE CONSULTANT ROGERS COMMUNICATIONS
